

### REMARKS

Claims 1 and 5 are being amended to conform these claims more closely to the specification. More specifically, these claims have been amended to recite that it is the first angle range, rather than the currently-recited second angle range, that is the broadest range, in accordance with paragraph [0043] and step S80 in Figure 3, which indicate that when there is no photographing-position information (corresponding to the first value and the first range recited in Claims 1 and 5), the angle range is set to be the broadest range: 0 to 360 degrees.

As a result, this amendment is needed for proper protection of the invention and would require no substantial amount of additional work on the part of the Office. Therefore, Applicants respectfully submit that this amendment satisfies the criteria for entry of M.P.E.P. § 714.16, and entry of this amendment is respectfully solicited.

Applicant's undersigned attorney may be reached in our Washington, D.C. office by telephone at (202) 530-1010. All correspondence should continue to be directed to our address given below.

Respectfully submitted,

/Gary M. Jacobs/
